Indian economy has showed signs of revival during fiscal year 2014-15. The new government revised the base year for calculation of economic growth from FY 2004-05 to FY 2011-12 and also introduced the concept of Gross Value Added at the aggregate and sector levels apart from revising industry groups. With the revised set, it is estimated that Indian economy grew by 6.9% in FY 13-14 and it is expected to grow by 7.5% in FY 14-15 and above 8% in FY 15-16. As per IMF estimates, Indian economy grew at 5.8% during 2014 against 5% during 2013. It expects the economic growth to exceed 7% in next couple of years. It is widely expected that Indian economy would grow faster if the present government carries on with its growth agenda and reforms.

INDIAN CAPITAL MARKET

Over the past twelve months, the Indian stock market was one of the best-performing in the world. The Indian stock market achieved a landmark by crossing Rs. 100 lakh crore (\$1.66 trillion) in market capitalization in November, 2014. The bullish trend in Indian markets over the last one year was mainly driven by Government backed measures such as movement on new reforms, execution of past policy announcements, enhanced infrastructure funding, positive surprise on rate cycle and lower oil prices. However, international events such as outcome of Greek debt crises, Middle East unrest have been upsetting the markets from time to time. Foreign Institutional Investors (FIIs) & market participants have gained confidence on the back of expectation that cooling inflationary pressures, a pro-growth government and an economy relatively sheltered from a potential economic slowdown, would continue to support bulls. Foreign investors are more confident about India than countries like Russia, China and Brazil as India offers a diversified basket and it still stands out among emerging markets in terms of economic growth and stability in corporate earnings. The confidence has further shot up because now India is least concerned about the Fed interest rate hike any time in near future as it has prepared shield of foreign exchange reserves. Total investment by FIIs in Indian equities has risen. India's competitive strength spans from telecommunication, IT, auto components, chemicals, apparels, pharmaceuticals and jewellery. More government initiatives are expected, such as, introduction of Goods and Service Tax (GST), passing of Land Acquisition bill in the parliament, recapitalization of public sector banks etc.

Foreign Institutional Investors made a net Equity investment of Rs. 1.09 lakh crore in 2014-15 and a further Rs. 1.64 lakh crore into debt markets – Rs. 2.73 lakh crore in all, as per the latest data available with Central Depository Services Ltd. (CDSL). This was the highest

net inflow by FIIs since being allowed to invest in Indian Capital Markets (Equity and Debt) over two decades ago in November 1992. The Reserve Bank of India (RBI) has cut policy rates by 25bps in January 2015 followed by another 25 bps in March 2015, and eased liquidity with a reduction in the statutory liquidity ratio (SLR) in three tranches of 50 bps in June 2014, August 2014 and February 2015. Despite these positive developments, FY2015 was difficult for the banking and financial services sector. At 9.5% credit growth was at its lowest in the last 18 years. Low credit growth plus high non-performing assets (NPAs) have resulted in banks being reluctant to pass on the benefits of the eased liquidity and rate cuts.

Sensex had touched all time high of 30024.74 and Nifty by 9119.20 on 4th March, 2015.

Fund raising from equity markets hit a five-year high in 2014-15 despite a lackluster showing by IPOs (initial public offerings). Money raised from equity markets doubled to Rs. 58801 crore in the financial year, the highest since 2009-10, as companies used the buoyancy to mobilise funds mainly under the QIP (qualified institutional placement) route. The benchmark indices gained about 25% during the year.

Fund raising in 2014-15 was substantially through the 55 QIPs which saw Rs.28429 crore being mobilised from institutional investors, up to 202% compared to the previous year, according to PRIME Database, which compiles data on the primary capital markets.

There were no big ticket IPOs during the year. Despite a stable government coming into power and the resultant buoyancy in the secondary market, only eight main-board IPOs came to the market collectively raising a meager Rs.2769 crore in 2014-15. This included only one Rs. 1000 crore plus IPO.

MUTUAL FUND

Fifty-one years have passed since the launch of US-64, India's first mutual fund (it was launched in 1964) **Financial year 2014-15 has been good for the Indian markets having posted their biggest gain in the past five years with a return of nearly 25%**. Most fund categories made money, thanks to a buoyant equities market and a secular-trending rate cycle. **In 2014-15, the country's 44 fund houses together saw a growth of 31 per cent in their asset base to Rs 11.88 lakh crore at the end of March 31, 2015**, according to data released by the Association of Mutual Funds in India (Amfi). The AUM stood at Rs 9.05 lakh crore in preceding fiscal and has been on the rise since 2011-12. In February 2015, the asset base of all the mutual fund companies breached the Rs 12-trillion mark. It took 188 months (or 15.6 years) for the Indian mutual fund (MF) industry to grow from Rs 79,500 crore (in July 1999) to Rs 12.02 lakh crore in February 2015 a gain of 1,412 per cent. It grew over 33 per cent in the last 14 months alone. Mutual fund (MF) industry's assets base has surged by nearly

Rs 3 lakh crore in 2014-15. **Flow ever mutual fund industry's assets under management (AUM) have barely reached Rs 12 lakh crore even as fixed deposits have almost six times as much, at Rs 70 lakh crore.**

COMMODITY MARKET OVERVIEW :

The turnover of Indian commodity exchanges declined by over 62% to Rs. 17.25 lakh crore till July 15 of the current fiscal due to poor trading volumes in almost all commodities.

"The turnover has declined due to higher Commodity Transaction Tax (CTT), which is in place since 1st July, 2013. There has also been decline in prices of gold, silver and other metal, commodity brokerage.

The investors' confidence has also come down in the futures trading after the Rs. 5600 crore payment crises at the National Spot Exchange Limited (NSEL), analysts said. There are five national and six regional exchanges in the country.

SIGNIFICANT ACCOUNTING POLICIES AND NOTES TO ACCOUNTS FOR THE YEAR ENDED 31ST MARCH 2015

1. SIGNIFICANT ACCOUNTING POLICIES:

1.1 SYSTEM OF ACCOUNTING

1.1.1 The accounts have been prepared under the historical cost convention except where otherwise stated.

1.1.2 The company follows the mercantile system of accounting.

1.2 REVENUE RECOGNITION :-

Income / Expenses/ Revenues are accounting for on accrual basis in accordance with the Accounting Standard (AS-9) issued by the Institute of Chartered Accountants of India. Accordingly, wherever there are uncertainties in the ascertainment / realization of Income, the same is not accounted for.

1.3 FIXED ASSETS: -

Fixed assets are stated at cost less depreciation.

1.4 DEPRECIATION :-

Depreciation on tangible assets is provided on the straight-line method over the useful lives of assets. The useful lives of the Assets are taken as prescribed under Part C of Schedule II of the Companies Act 2013. Depreciation for assets purchased / sold during a period is proportionately charged.

1.5 INVESTMENTS :-

Investments (long term) are valued at cost less permanent diminution, if any.

1.6 STOCK IN TRADE :-

Stock in Trade of shares/Debentures/Units etc. is valued at scrip wise lower of cost or net realizable value.

1.7 EMPLOYEES BENEFITS:-

Employee benefits are recognized / accounted for on the basis of revised AS-15 detailed as under:-

1.7.1 Short term employee benefits are recognized as expense at the undiscounted amount in the profit & loss account of the year in which they are incurred.

1.7.2 Employee benefits under defined benefit plans comprise of gratuity which is accounted for as at the year end based on actuarial valuation by following the projected unit credit (PUC) method.

1.7.3 Leave encashment benefits are paid to employees at the year end.

1.7.4 Termination benefits are recognized as an expense as and when incurred.

1.7.5 The actuarial gains & losses arising during the year are recognized in profit & loss account of the year without restoring to any amortization.

1.8 DEFERRED TAXATION:-

Tax liability of the company is estimated considering the provisions of the Income Tax Act, 1961. Deferred Tax is recognized subject to the consideration of prudence, on timing difference, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

1.9 IMPAIRMENT OF FIXED ASSETS

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the Company's fixed assets. If any indication exists, an asset's recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor.

Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. However, the increase in carrying amount of an asset due to reversal of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for the assets in prior years.

1.10 CONTINGENCIES

The company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.
